

How I Will Know Medicine is Helping Me: Antipsychotic Meds

The medicine I have been prescribed:

If this medicine works for me, I may
experience some effects within:

To experience the full effect , it may take:

_____ (hours/days/weeks)

_____ (days/weeks/months)

In order to be helpful, I need to take my antipsychotic medication:

☐ Every day ☐ Whenever I need it (PRN) ☐ Other: _____

How will you know if this medication is working for you? Place a check in the box next to the medication effects that are most important to you. Or, write how you hope the medicine helps.

☐ Able to concentrate better

☐ Feeling more comfortable around others

☐ Improved sleep

☐ More awareness; less confusion about
what may or may not be true

☐ Better able to remember things

☐ My words: _____

☐ Feeling more relaxed

What other things can help? Medication may help you feel better. There are also things you can do to help yourself feel better. Often the pathway into recovery means finding the right balance between our psychiatric medicine (*what we take*) and our Personal Medicine (*the things we do to feel better and how they help*).

Example: My Personal Medicine is listening to my playlist because it helps decrease my voices.

My Personal Medicine for psychosis is:

Keeping track. Keep track of how you are doing over the next two weeks. Indicate if you took your pill medicine, if you used your Personal Medicine, and whether the meds were helpful. Share your calendar with your psychiatric care provider at your next appointment.
